Gentlemen,

The updated waste tracking spreadsheet is attached. We sent 18 Class 1 roll-off boxes to the Republic Gulf West Landfill and 2 (~5,400 gal each) water trucks to Texas Molecular. The water trucks transported hazardous liquids from tank 8-1. Let me know if you have any questions.

Thanks,
Jim

Gents,

No incident related waste off-site today. We are chasing down the bills of lading for scrap metal loads and will relay when able.

The good news: we have approval to move two new wastes off-site and will begin doing so ASAP. Class 1 roll-off boxes will begin transport tomorrow and we will hopefully be moving water from 100-35 off-site, beginning Monday.

In addition, EPA informed us they have no objections to the most recent hard boom addendum. Now, we're just lacking TCEQ approval.

Let me know if you have any questions,
Jim

Subject: Daily Waste Tracking

Gentlemen,

The updated waste tracking spreadsheet is attached. Nine non-hazardous water trucks were transported off-site today. In total, 69 trucks (~8,000 bbls) of non-haz water have been transported to Delta.

We have been loading from tank 8-1, which was filled by the Kirby 28177 barge. The tank is empty and we are currently unable to pump from the barge. Consequently, we will not be running the water trucks tomorrow. Hopefully the situation will soon be remedied.

I do not have scrap metal totals for today but will get those numbers ASAP. Let me know if you have any questions.

Thanks,
Jim
